

ethcon Korea

Community-driven Conference for Ethereum Developers

Sponsor Book

Venue

Coex Grand Ballroom

Seoul, South Korea

May 27 ~ 28, 2019

ABOUT

ethcon Korea is a **non-profit conference** for Ethereum developers organized by 23 community volunteers. We do not speak for a specific organization or group's agenda and aim to ramp up the Korean open-source developer ecosystem.

Although there are a lot of Ethereum communities in Korea and South Korea has played an important role in the ecosystem, the Korean dev community has had difficulty in sharing their studies with others due to the lack of suitable outlets.

Therefore, Korean Ethereum community kicks off the **first community-driven conference** for Ethereum developers to meet the demand.
